10% Mandelic Acid

Night
Face SERUM

Cosmetic Laboratories
MADE IN ITALY

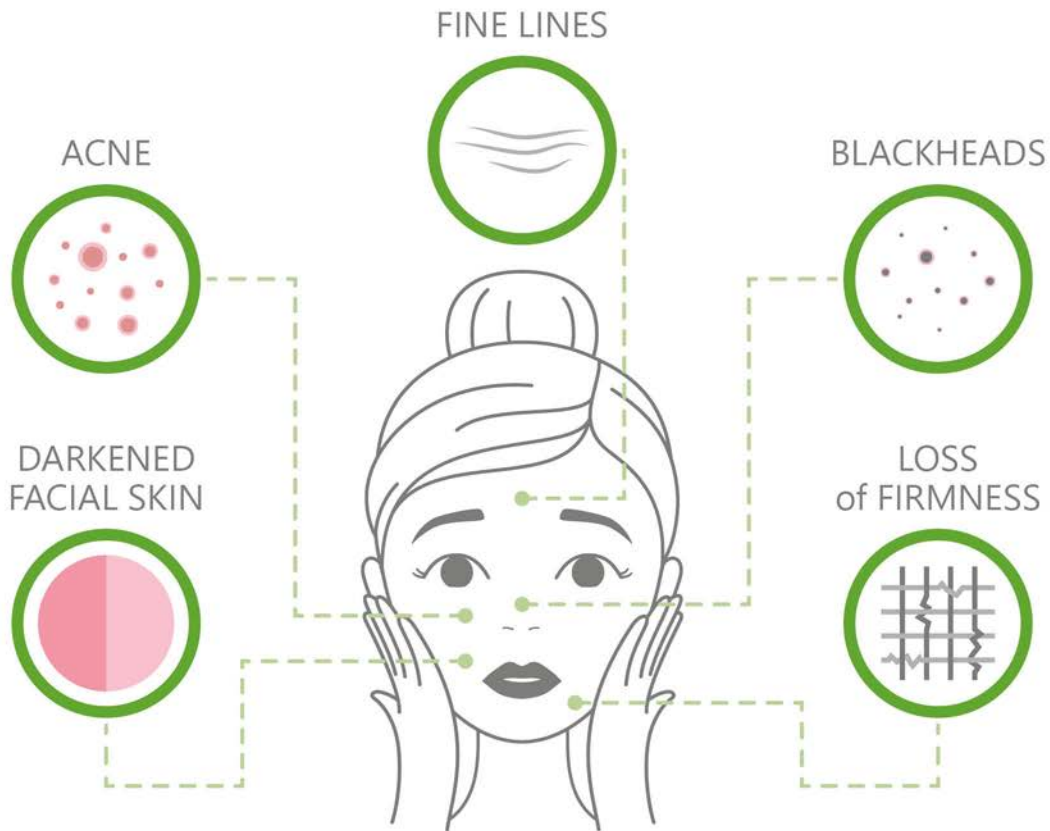

Powered by **10% Mandelic Acid (*)**, this serum is a must-try resurfacing elixir for promoting cellular turnover, smoothing away dead skin cells and fine lines to reveal visibly even tone and radiant skin.

The formula also features **Aloe Vera** for a conditioning touch post-application.

() Bitter almond extract*

INDICATIONS:

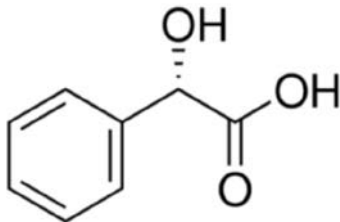

About mandelic acid

Mandelic Acid is an α hydroxy acid (AHA) extracted from the *bitter almond*.

AHAs are natural and synthetic ingredients that provide skin care benefits ranging from exfoliation to increasing hydration and firmness.

Benefits of mandelic acid

Gentle on the skin

Mandelic Acid is the largest aromatic AHA. Since it has a large molecular size, it is **less of an irritant** and it is suitable for all skin types and complexions.

Accelerates cell turnover

Alpha hydroxy acids **speed up the cellular turnover rate**, ridding the skin of dead cells that enhance the natural creases in skin and dull the complexion.

Promotes collagen production

Mandelic acid also improves skin appearance because it promotes collagen production, which is the main protein found in skin and connective tissue.

Needful in beauty regime

Mandelic Acid serves three main purposes by targeting:

wrinkles and fine lines

hyperpigmentation
and discoloration

acne and acne scars

Why?

Mandelic Acid works on two levels: as a **mild exfoliant** and as an **antibacterial**.

MANDELIC ACID

As an exfoliant, it has been shown to

eliminate **fine lines** and **wrinkles** from the skin.

It is also a great alternative to steroids and hydroquinone for treatment of **hyperpigmentation**, including melasma.

MANDELIC ACID

Mandelic acid penetrates the epidermis more slowly and uniformly because of

its large size, making it ideal for sensitive skin types such as **rosacea** with severe acne and pigmentation.

MANDELIC ACID

It is also one of few ingredients

recommended for those with darker
complexions.

MANDELIC ACID

Antibacterial properties of Mandelic Acid are especially beneficial in the treatment of oily skin and acne.

Moreover, it helps to regulate sebum production thus decreasing the occurrence of breakouts.

MANDELIC ACID

For adults who suffer from acne and want to fight wrinkles too, Mandelic acid is a terrific option as it addresses both of these concerns.

Mandelic acid can lighten the dark spots left behind after an acne breakout and ease the inflammation brought on by rosacea.

Skin texture

Removal of dead skin cells promotes firmer and smoother skin.

ALOE VERA Gel

A background image of several green, pointed Aloe Vera leaves with visible water droplets on their surfaces, creating a fresh and natural aesthetic.

The use of aloe vera in skincare is no surprise as it's a well-known plant that has been a successful, effective skincare ingredient for a long time.

The plant offers great benefits for the skin and its properties have been recognised for thousands of years in traditional medicine.

Aloe vera gel has great moisturising properties. That's because it is rich in **polysaccharides**.

Polysaccharides are highly hygroscopic and bind to moisture.

On the other hand, its structure forms a protective film for the skin, which helps give it its healing properties. It also aids protection of the epidermis and the skin's ability to restore itself.

ALOE VERA Gel

Aloe vera gel also comprises **vitamins, amino acids, minerals and enzymes**, which provide its skin-soothing effect.

The products

Face SERUM
(night)

Face TONIC

Face & Body MILK
(day & night)

Face & Body SOAP
(day & night)

Face SERUM (night)

Powered by 10% Mandelic Acid, this serum is a must-try resurfacing elixir for promoting cellular turnover, smoothing away dead skin cells and fine lines to reveal visibly even tone and radiant skin. The formula also features Aloe Vera for a conditioning touch post-application.

Size of 100ml

Face TONIC (day & night)

Packed with Aloe Vera (for freshness and hydration) and Mandelic Acid (for cell turnover facilitation) this tonic provides gentle but effective purifying and exfoliating actions and helps to tone, firm and uniform the skin.

Size of 200ml

Face & Body MILK (day & night)

The exclusive combination of Aloe Vera and Mandelic Acid provides gentle but effective smoothing action, leaving the skin immediately velvety and brighter.

Size of 400ml

Face & Body SOAP (day & night)

The rich creamy foam incorporates properties of Aloe Vera (*healing and hydrating*), Bamboo White Powder (*exfoliating*) and Mandelic Acid (*accelerating turnover of skin cells*).

Size of 200g

Allow skin to build tolerance to AHA

Mandelic acid is generally very well tolerated even by sensitive skin.

Nevertheless, there's a risk of side effects when using **any skin care product**.

Application of AHA should start gradually: 2/3 times per week until skin builds tolerance.

Frequency of applications may be increased or decreased according to personal skin sensitivity.

Patch testing prior to use is advised.

Before applying **any new product** all over the face, it is advisable to **try it in a small portion of skin**, perhaps in the neck (where it is thinnest and most reactive), and **wait for the next 24 hours** to see if any allergic reactions arises.

Stop use in case of any type of irritation,
including:

- redness
- swelling
- itching

If skin irritation develops after several days or weeks of using Mandelic acid, this might be due to **overuse**.

In this case it should be sufficient to reduce the frequency of applications to see improvements.

Skin protection!

As with any other AHAs, it's extremely important **not to use it in conjunction with retinol**, as that can cause over-exfoliation.

It is recommendable to wear **sunscreen** during the daytime when mandelic acid is part of skincare routine the night before.
